THE **BETTER** MEMORY FOAM[™]

THE **BETTER** MEMORY FOAM™

For years, ComforPedic® from Beautyrest® has been a leader in improving memory foam technology. Unlike some memory foams that are known for a sinking hard-to-move sensation and heat buildup, our proprietary formulation not only responds quickly to your movements, but also dissipates heat to help keep you at your ideal sleeping temperature.

Our expertise has enabled us to make a memory foam mattress with exceptional performance that helps promote cool, comfortable, recharging sleep.

Cool Comfortable Sleep

AirCool® Design with *TruTemp*™ Technology

Pressure Relief

AirCool® Memory Foam with GelTouch™ Technology

Designed To Help Promote Proper Sleeping Posture™

Independent Support™ Technology

Cool Comfortable Sleep

AIRCOOL® DESIGN

Our AirCool® Design consists of components that work together, allowing the bed to breathe and help keep you at your ideal sleeping temperature. In addition to the AirCool® Memory Foam, this design includes an AirCool® Edge. Its ventilated design enhances airflow through the mattress as you sleep while also providing comfort all the way to the edge. A high-tech AirCool® Mesh Border Fabric allows the mattress to breathe so you can sleep more comfortably.

TRUTEMP™ TECHNOLOGY

Is a space age substance encapsulated in our GelTouch™ beads, that helps regulate sleeping temperature. As your body warms the mattress, the TruTemp™ technology absorbs the excess heat and stores it. As you move during the night and the mattress cools down, the captured heat is released from the foam, helping to keep you in a comfortable temperature zone.

Pressure Relief

AIRCOOL® MEMORY FOAM

Our proprietary-formulation memory foam offers enhanced airflow, pressure relief, sleep-temperature regulation, and quicker recovery, for the ultimate in cool, comfortable sleep.

GELTOUCH™ TECHNOLOGY

Our exclusively formulated AirCool® Memory Foam contains comfort-enhancing Micro GelTouch™ Technology. Gel beads embedded throughout the foam offer exceptional pressure relief.

Designed To Help Promote Proper Sleeping Posture™

SUPPORT TECHNOLOGY

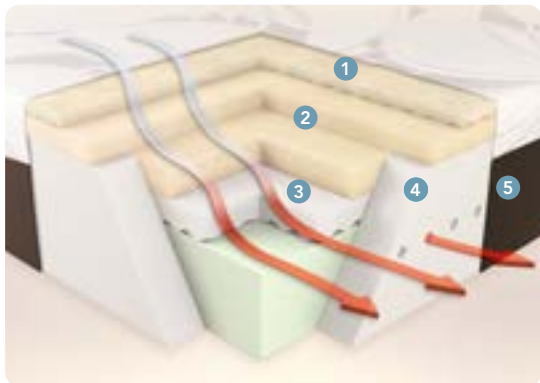

Independent Support™ Technology

Rows of sculpted cushions respond independently to your shape and movement for personalized support. Airflow between the cushions also helps dissipate heat, helping to keep you in a comfortable sleeping zone.

Multi-action support layer

Multiple layers work in unison to provide exceptional support and pressure relief, while a ventilated inner layer helps generate airflow. Available on select models.

FIVE INNOVATIVE TECHNOLOGIES WORK ON SEVERAL LEVELS TO GIVE YOU COOL, COMFORTABLE SUPPORT – TOP TO BOTTOM.

- 1 AirCool® Memory Foam with TruTemp™ Gel**
Absorbs, stores and releases excess warmth to help keep you in a comfortable temperature zone.
- 2 AirCool® Memory Foam**
Conforms to your body and provides pressure point relief and freedom of movement.
- 3 Independent Support™ Technology**
Designed to help promote Proper Sleeping Posture.™
- 4 AirCool® Edge**
Enhances airflow through the mattress and offers support and stability right to the edge.
- 5 AirCool® Mesh Border Fabric**
Enables greater breathability and airflow.
